

Redmine - Defect #17931

note "Applied in changeset" generated multiple times for the same repo

2014-09-23 01:25 - Sergiy Zuban

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Jean-Philippe Lang	% Done:	0%
Category:	SCM	Estimated time:	0.00 hour
Target version:	2.6.0	Affected version:	2.5.2
Resolution:	Fixed		
Description			
<p>I have couple sub-projects, but all of them uses the same GIT "Main" repository. After recent upgrade to 2.5.2 scan_changesets_for_issue_ids() treats one changeset as independent changesets in sub-projects and as a result adds "Applied in changeset SUBPROJECT:XXXXXXX" notes as well as note without prefix "Applied in changeset XXXXXXXX".</p> <p>"Associated revisions" section points to the same revision multiple times making this feature annoying/useless.</p>

Associated revisions

Revision 13427 - 2014-10-05 14:10 - Jean-Philippe Lang

Don't link multiple changesets from the same commit multiple times (#17931).

History

#1 - 2014-10-05 14:12 - Jean-Philippe Lang

- Category changed from Issues to SCM
- Status changed from New to Closed
- Assignee set to Jean-Philippe Lang
- Target version set to 2.6.0
- Resolution set to Fixed

This should be fixed by r13427. If a changeset from another repository that points to the same SCM backend (exact same URL configured in Redmine repositories) is already associated with the issue, other changesets won't be added.

#2 - 2015-01-15 14:26 - Toshi MARUYAMA

- Duplicated by Defect #18850: Multiple repos with same commits is parsed multiple times. added
