Redmine - Patch #17947

Mirror relation

2014-09-24 17:49 - Damien Viennot

Status:	New		**Start date:**	
Priority:	Normal		**Due date:**

Target version:				

Description

Several posts on the forum are about the need of mirroring issues, ie auto updating the status of related issue.
This is an attempt to achieve this result by creating a new relation (two in fact...) called mirror.

The drawback is that callbacks are not properly handled : these patch are not a finished product.

Provided patchs are for the 2.3.0 version, but can easily be transposed for the 2.4 or 2.5 series.
Files to be patched : app/models/issue.rb
app/models/issue_relation.rb
config/locales/fr.yml (ok, for french people....)
