Target version:	2.6.0	Affected version:	
Resolution:	Fixed		
Description Hi there, I've tested a bug which seems reproducible. The preview shows up the ticket description instead of the comment text. Ways to reproduce: <ul style="list-style-type: none">• create 2 projects, allow a user to switch an issue between both projects• create a ticket in project 1 with a description.• edit this ticket, add a comment. show preview -> works• edit this ticket, add a comment, change the project to project 2. show preview -> you won't see the preview of the comment, just the original description. Tested on current trunk and on Redmine 2.4.2 and 2.5.2. Best regards, Daniel Best regards, Daniel			

Associated revisions

Revision 13428 - 2014-10-05 15:18 - Jean-Philippe Lang

Fixed that preview doesn't show notes when issue project is changed (#17959).

Revision 13429 - 2014-10-05 15:24 - Jean-Philippe Lang

Reverts change in r13428, project can't be found by identifier (#17959).
