

Redmine - Defect #17970

Wiki PDF export doesn't render macros

2014-09-26 11:34 - Fabian Strasser

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	PDF export	Estimated time:	0.00 hour
Target version:		Affected version:	2.5.1
Resolution:	Duplicate		
Description <p>This is something bugging me for quite some time now, but so far I haven't found a solution:</p> <p>When you export a wiki site that uses macros to PDF the output doesn't show the rendered/parsed state but only the source-code which isn't useful at all (see attached images). The page should be rendered first, then be converted to PDF.</p> <p>This is also related to another issue/feature request I have: #17238. There the same problems bugs me, but not for the PDF export, but for the search function.</p>			
Related issues: <p>Is duplicate of Redmine - Feature #13051: Support any macro in (pdf) export f... Closed</p>
