<b>Resolution:</b>	Fixed		

**Description**

here: [http://www.redmine.org/projects/redmine/wiki/Alternativecustom\\_authentication\\_HowTo](http://www.redmine.org/projects/redmine/wiki/Alternativecustom_authentication_HowTo)

The doc said:

Implement Your AuthSource Subclass  
Create a new file for your AuthSource subclass in app/models/, following the naming scheme of the existing auth\_source.rb and auth\_source\_idap.rb.

- Here we'll use `app/models/auth_source_myApp.rb`

The exact filename should match the Class name: AuthSourceMyCustomApp

Correct filename is: `app/models/auth_source_my_custom_app.rb`

### History

#1 - 2014-10-04 09:51 - Jean-Philippe Lang

- Status changed from New to Closed

- Resolution set to Fixed

Fixed, thanks.
