Duplicate of [#3114](#).

#2 - 2014-10-23 09:53 - Toshi MARUYAMA

- Is duplicate of Defect #3114: Text formatting is not applied in activity page added

#3 - 2014-10-23 09:55 - Anonymous

That duplicate does not describe the problem. I do not want to show the image in the activity view. There should be a notice **that an image has been added**. Instead there is **nothing**.

- Tracker changed from Defect to Feature
- Subject changed from No activity entry when no comment in note (e.g. only image added) to Activity entry when a file is added to an issue

For now, only status changes and notes are added to the activity. No entry for when a file is added.

I am not sure but isn't that a bug? The activity label indicates that every activity (if select on right side) is mentioned. Eg. in our team we are not using mail notifications and had a lot of confusions because of that missing functionality. Are there more activities that are not mentioned on that page?
