

Redmine - Defect #18173

Mixed rails versions in trunk?

2014-10-23 18:42 - Ivan Cenov

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Rails support	Estimated time:	0.00 hour
Target version:		Affected version:	2.6.0
Resolution:	Invalid		
<b>Description</b>			
After updating trunk to <a href="#">r13495</a> here is what I saw			
<pre>Microsoft Windows [Version 6.1.7601] Copyright (c) 2009 Microsoft Corporation. All rights reserved.  D:\apps\redmine_svn&gt;thin start -e production -p 3000 Using rack adapter ←[31mCould not find gem 'tzinfo-data (&gt;= 0) x86-mingw32' in the gems available on this machine.←[0 m ←[33mRun `bundle install` to install missing gems.←[0m  D:\apps\redmine_svn&gt;bundle install --without test development Fetching gem metadata from https://rubygems.org/..... Fetching gem metadata from https://rubygems.org/..... Resolving dependencies... You have requested:   rails = 4.1.6  The bundle currently has rails locked at 3.2.19. Try running `bundle update rails`  D:\apps\redmine_svn&gt;</pre>			
I saw similar mixing of rails versions when upgraded our Redmine production server to 2.6.0. Is this some mismatch in trunk?			

History

#1 - 2014-10-23 20:28 - Toshi MARUYAMA

trunk uses Rails 4.1 from [r13482](#).

#2 - 2014-10-23 23:55 - Jean-Philippe Lang

- Status changed from New to Closed
- Resolution set to Invalid

No mismatch, you need to remove your Gemfile.lock or run `bundle update` instead.
