<b>Resolution:</b>	Fixed		
<b>Description</b>			
<p>I applied the pdf.rb.patch from <a href="#">#14466</a> in my old Redmine Version 2.5.</p> <p>I updated to 2.6.0. But there is still the problem that an export of issues with long text to pdf is corrupt.</p> <p>The pdf.rb file was heavily adjusted. So the patch doesn't take an affect.</p> <p>I tried a bit on my own. But I'm really new on ruby.</p> <p>Could you please give me quick support? It's an important feature for us.</p> <p>Thank you.</p>

I researched a bit and noticed the following:

The problem is still given but in an other way!

The text overrun changed from left to right to top to bottom (See attached pdfs!)

- File *issues.pdf* added

The defect is limited when I export a single issue.

But when I export a query of issues it looks like the attached pdf.
