Category: Accounts / authentication	Estimated time: 0.00 hour
Target version:	
Resolution: Fixed	
Description	
For example on our system we have two options available to us: <ul style="list-style-type: none">- Secure LDAP (label for an LDAP connection)- Internal I'd like to be able to filter on all of the Internal users, but AFAIK I am unable to do so. A workaround for us will be to create a special group and add the users there so we can limit based on that group.
