<b>Description</b>			
My title suggest it all. Issues should have a Yes or No vote where members can or cannot replicate a posted issue.

With Feature [#1011](#) we already have an issue regarding voting for tickets.

In my opinion voting if someone can or cannot reproduce a defect is just a special case of [#1011](#).

This one could be implemented with [#11655](#) and [#1011](#).

This would be something like Atlassian Jira.
