<b>Description</b>			
Hi			
We have recently upgraded redmine from 1.1.2 to 2.5.2 Everything went smooth, almost all issues are fine and show no errors. Attachments are working, etc.			
However, some issue give us the following error:

I have checked that particular one in MySQL database and it has no attachments.			
Please give any hint on where I could look to find the reason of this issue.			
Thanks in advance.

```
UPDATE journals SET journalized_type = 'Issue' WHERE CAST(journalized_type AS BINARY) = 'issue';
```

Thank you very much.
