Description

I wanted to change elements of default my page site.

I have done this by editing:

`app/controllers/my_controller.rb`

and changing:

`DEFAULT_LAYOUT`

Constant

I think that it will be better to move it somewhere to configuration file.

It will be preserved eg. after update process

What do you think?

+1

Default blocks definition has been moved to lib/redmine/my_page.rb in r15930.
