<b>Target version:</b>	2.6.1	<b>Affected version:</b>	2.3.1
<b>Resolution:</b>	Fixed		
<b>Description</b>			
Hello.			
I've encountered a problem, related to the redmine formatting. The thing is, that when I try to add issue description (or comment) with the following content:			
Any text <a href="https://name.domain.com/issues/91243">https://name.domain.com/issues/91243</a> <a href="http://name.domain.com/00boUr-6IA1oXahp/">http://name.domain.com/00boUr-6IA1oXahp/</a>			
The first link doesn't seem to appear like a link. It's just a plain text. As far as I can get it, this problem caused by a bug in the WikiFormatting auto_link! method. Speaking more precisely, I think that regex is not completely correct. So, is it really a bug or am I doing something wrong?			
My version of redmine is 2.3.1.stable, Postgres 9.3.5, ruby 1.9.3 stable and rails 2.2.2.
