<b>Description</b>			
There is an inconsequence usage of class 'tabular' on /my/account. One fieldset has no 'tabular' class.			
<pre>&lt;div class="splitcontentleft"&gt;   &lt;fieldset class="box tabular"&gt; &lt;/div&gt; &lt;div class="splitcontentright"&gt;   &lt;fieldset class="box"&gt;     &lt;fieldset class="box tabular"&gt; &lt;/div&gt;</pre>			
<b>Edit:</b> The same on the page "New issue". Not every fieldset has the class 'tabular'.

I think it is not a problem. Adding "tabular" class to the Email notification box will break the layout.
