**Description**

I'm trying to run database migrations for Redmine r1778 and receive the following error:

```
can't activate rubyforge (= 0.4.5, runtime), already activated rubyforge-1.0.0 (Gem::Exception)
```

I use Ruby 1.8.6, Rails 2.1.0, and gem rubyforge-1.0.0 installed.

Trace log is attached

## History

#### #1 - 2008-09-10 13:12 - Aleksei Gusev

It looks like a problem is in vendor/plugins/actionwebservice. I have tried to replace it with new version and rake db:migrate works fine.

#### #2 - 2008-09-17 19:26 - Jean-Philippe Lang

I don't have this problem with rubyforge-1.0.0 installed.
Could you point to the new version of actionwebservice that solves your problem please ?

#### #3 - 2008-09-19 10:32 - Aleksei Gusev

The version of actionwebservice is 1.2.6.

#### #4 - 2008-10-27 10:23 - Aleksei Gusev

Ooops... This fixes at least for me by removing rubyforge-0.4.4 gem which was installed in ~/.rubygems. So, I think the bug appears when both versions of rubyforge is installed.

#### #5 - 2008-10-27 13:08 - Jean-Philippe Lang

*- Status changed from New to Closed*

*- Resolution set to Invalid*

OK, thanks for the feedback. I close since it doesn't seem to be related with Redmine.
