

Redmine - Defect #18417

Invalid username or password after core hours

2014-11-22 17:15 - Guy Volckaert

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Accounts / authentication	Estimated time:	0.00 hour
Target version:		Affected version:	2.5.2
Resolution:	Invalid		
Description			
Hi,			
I noticed this weird problem and I wanted to know if anyone else have seen it. During normal working hours I can login Redmine using LDAP. But if I try to access Redmine after core hours (e.g. > 6pm or weekends) then I often get a error when I attempt to login - invalid username or password. I contact our IT department (since they installed and configured Redmine), but they cannot find a reason why this is happening.			
Any help would be appreciated.			

History

#1 - 2014-11-22 17:17 - Guy Volckaert

I forgot to mentioned that we are using Windows 7 64-bit.

#2 - 2014-11-22 17:41 - Toshi MARUYAMA

- Status changed from New to Closed

- Resolution set to Invalid
