Description

Hi,

I've been testing the latest svn release and it would be a more complete trac import if a subpage like this "Page/SubPage/SubSubpage" could be imported to the new "Hierarchy and Breadcrumbs" feature (#528). Instead of stripping the slashes into a new wiki page "PageSubPageSubSubpage".

Thanks

daniel

+1

I would like also wiki paths with slashes. I also prefer lowercase paths ("/page/subpage/subsubpage/"), redmine forces camelcase.
