Description

Hi,everyone
I like redmine very much.
during my using the redmine,I alaways link two related issues on the issue page by clicking the "add" link.
would I can simply by right clicking two selected issues on the issue listing page to make the two issues to be related issues.that would be perfect.
thanks.

This essentially can be achieved if we add "Related issues" through context (on right-click) menu like bulk-edit.
