Redmine - Defect #18479

Can't use reposman.rb to create both git and svn repositories

2014-11-27 18:53 - Pierre BLONDEAU

Status:	New		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	SCM extra		**Estimated time:**	0.00 hour
Target version:				
Resolution:			**Affected version:**	2.5.1

Description

Hi,

When I try to create git repositorie after the svn with reposman.rb, I get the message: Failed. Response code = 409. Response message = Conflict.

I found this feature here :
http://www.redmine.org/projects/redmine/wiki/Install_Redmine_with_git_and_svn_support_over_https_on_Debian_wheezy_using_the_Debian_repository .

How can I do that without make an insert in the database?

Regards
