Description

This patch improves use of html elements on project landing page.

- Wraps all kind of "labels" in `<span class="label">...</span>`
  - e.g. the member roles in the member box
- Changes content of the member box to one paragraph per role instead of one paragraph for all roles
- Wraps news comment label in a `<span class="comments">...</span>`

This is useful if you'd like to bolden the member roles for example.
