

Redmine - Feature #18609

Elevate to admin mode for authorized user instead of always working at admin level

2014-12-09 15:13 - Scott Cunningham

<b>Status:</b>	New	<b>Start date:</b>

<b>Target version:</b>			
<b>Resolution:</b>			
<b>Description</b> <p>It would be nice to allow users that are "administrators" to work as a normal user unless they need to elevate to admin level to fix/alter something (same idea as sudo in linux - I <i>can</i> be admin, but only when I <i>need</i> to be admin).</p> <p>Redmine requires one user / one email. I am one of several Redmine administrators. We like to know which admin did something (not just generic admin login). I don't like to work at admin level all the time (can't see correct workflows, delete stuff when I should not, etc). I cannot create a second work email. I could create another account at admin level using my personal email (for password recovery), but don't want to mix business with personal...</p> <p>Possible implementations:</p> <ol style="list-style-type: none"><li>1. Username append<ul style="list-style-type: none"><li>◦ username login = normal user mode</li><li>◦ username-adm login = same user but at admin level</li></ul></li><li>2. Login addt'l step<ul style="list-style-type: none"><li>◦ login as username</li><li>◦ check if admin possible for username</li><li>◦ popup box "Login with Admin Rights?"</li></ul></li><li>3. Other methods?</li></ol>
