**Description**

Hi,
I've tried to use REST API for creating issues but found that there no way to post multiple attachments via JSON - it works for single attachment only!
When I post an "upload" JSON data as array (with brackets '[]') under "uploads" node, redmine API successfully creates an issue but without attachments - it simple ignores it. It works only if I put a single attachment straight under "uploads" section, without using an array format ('[]').

## History

**#1 - 2014-12-22 13:04 - Jean-Philippe Lang**

Could you post the JSON you post to create the issue with multiple attachments?

**#2 - 2014-12-22 13:22 - Jean-Philippe Lang**

Works fine for me with current trunk with:

```
{
  "issue": {
    "project_id": "1",
    "tracker_id": "1",
    "subject": "Test issue",
    "uploads": [
        {"token": "12035.d595398bbb104ed3bba0eed666785cc6", "filename": "test1.gif"},
        {"token": "12036.d595398bbb104ed3bba0eed666785cc6", "filename": "test2.gif"}
    ]
  }
}
```

Thank you for reply! Can't check it right now, will check in a few hours later. The only difference I can see for now - you are not using "upload" node as it states documentation here:
[[http://www.redmine.org/projects/redmine/wiki/Rest_api#Attaching-files]]

I.e.
"uploads": [
"upload": { "token .... }
"upload": { "token .... }
]
Is it difference for XML and JSON? Or it just docs not so updated?

UPDATE: Now I see - it's my fault. Didn't think too much about difference between arrays in XML and JSON :) Sorry about that, you can close the issue.

*- Status changed from New to Resolved*

**#5 - 2014-12-22 14:59 - Jean-Philippe Lang**

*- Category set to REST API*

*- Status changed from Resolved to Closed*

Thanks for the feedback, I've added an example to the API guide.
