History

#1 - 2008-09-09 20:15 - Nicolas Chuche

Works here with rev 1794.

Could you paste the generated html for links ?

#2 - 2008-09-09 21:50 - Ismail SEZEN

For Documenteation of Redmine overview example :

Note: I especially added the space chars between brackets in the </pre> tag for now.

Wiki Syntax:

```
...
h2. Documentation

[ [ Guide|Redmine guide ] ] (work in progress).
...
```

Html Output:

```
...
<h2 id="Documentation">Documentation<a href="#Documentation" class="wiki-anchor">&para;</a></h2>

<pre><code>(work in progress).</code>< /pre>
...
```

#3 - 2008-09-15 12:01 - Ismail SEZEN

I've updated the redmine copy to [r1860](#) and problem has been disappeared. It's working now.

#4 - 2008-09-17 19:14 - Jean-Philippe Lang

- *Status changed from New to Closed*
- *Affected version (unused) deleted (devel)*

Thanks for the feedback.
