Description			
<p>Hi,</p> <p>Redmine is a wonderfull tools, but i need some help with "Send notifications". Specifically, when i put some "News" and i receive in my emails the news without the image attachment or the image i put in the module. It is great when i click the url on my email and send me, to see the news in Redmine but... Can I show the images on email too?</p> <p>Again, i put the image on Redmine and i can see the image but...no the images on email after "the notification email"?</p> <p>PD: "Im just learning english and i will apreciate the help". Ty.</p> <p>Invierno.jpg</p>
