

Redmine - Defect #18788

Not all columns are saved after their reordering in a custom query

2015-01-09 11:10 - Karel Pičman

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:		Affected version:	2.6.0
Resolution:	Duplicate		
<b>Description</b> When I edit a custom query the way that I move a selected column up, the columns below the selected column are removed from the query as a result.  When the query is being saved it is visible that - by a javascript code probably - only the columns above the moved columns are selected(step3.png).  <u>Example:</u>  <b>1. The original state</b>  before.png <b>2. Edit the query</b>  step1.png <b>3. Move the last column <i>Author</i> up</b>  step2.png <b>4. Save the edited query</b>  step3.png <b>5. The result</b>  after.png			
<b>Related issues:</b> Is duplicate of Redmine - Defect #18777: Moving column to top of "Select Colu... <span>Closed</span>			

History

#1 - 2015-01-10 22:22 - Jean-Philippe Lang

- Status changed from New to Closed
- Resolution set to Duplicate

Same as [#18777](#), fixed in 2.6.1.

#2 - 2015-01-10 22:23 - Jean-Philippe Lang

- Is duplicate of Defect #18777: Moving column to top of "Select Columns" results in loss of all other column selections added
