Edited, to make this issue easier to read

I think it's really nice if redmine has this feature.

For example:
Currently i have 30 custom fields, And i want to add 5 more custom fields.
These new fields should be in middle of existing fields, start from number 15.

1-15 (15 existing fields)
16-20 (**new fields**)
21-35 (existing fields)
total 35 custom fields.

I'm not a programmer, i dont know if it can be coded.. imho, this is what it looks like:

- In http://www.domain.com/ / **custom_fields?tab=IssueCustomField**
- There is a button "edit shorting" [1-redmine-edit-sorting-button.png]

  1-redmine-edit-sorting-button.png
- If clicked, the sort colom will be editable and we can change the number as we needed
- Than click save [2-redmine-save-sorting-button.png].

  2-redmine-save-sorting-button.png
Or Maybe we can look at joomla in its way to shorting article priority. *
