<b>Description</b>			
Hello.			
I would really appreciate function, where I have possibility to choose in which projects my custom field for "spent time" is available.			
Now, when I create new custom field, I see it in every project, every time I have to register work time.			
What if custom field is custom for project X and is required, but completely does not suit for project Y?

##### Custom fields for spent time should have more options like here:

<http://www.redmine.org/attachments/download/12958/2.PNG>

##### Then, you could choose if you want to use those custom fields when you configure the project (example):
