Redmine - Feature #18831

Support Automatic Assigning of Issues on Status Change

2015-01-13 22:04 - Chris Bush

Status:	New		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	Issues workflow		**Estimated time:**	0.00 hour
Target version:				
Resolution:				

Description

I'd like the ability to update the "Assigned To" field to certain macros when an issue status is updated to certain statuses. For example, if I change the status to something like "Awaiting More Information," I'd like the Assigned To field to automatically be updated to the reporter (perhaps as a <<reporter>> macro, similar to <<me>>). This could be accomplished by adding a field to the Issue Statuses interface in administrative settings.

try this plugin
http://www.redmine.org/plugins/custom-workflows

the code would look like.

self.assigned_to_id = User.find_by_login("ChrisBush").id if status_id == 14

it runs great for me. Im using redmine 2.6
