

Redmine - Defect #18894

Grouping of Boolean field: Both "No" and "blank" tickets are grouped in "none" groups

2015-01-19 06:32 - kaz k

Status:	Closed	Start date:	
Priority:	Normal	Due date:

Category:	Custom fields	Estimated time:	0.00 hour
Target version:	2.6.2	Affected version:	2.5.0
Resolution:	Fixed		

Description

Boolean custom field can have three values; "Yes", "No" and " (blank, or to say, not specified) " if the field is not specified as "required".

- Ref.
 - Issue #17003-6
 - Wiki ""Boolean: checkbox (enabled/disabled) or radio buttons (**null/yes/no**) " in [[RedmineCustomFields]]

I think it is OK.

But I found that both "No" and " (blank, or to say, not specified) " are grouped under same name (label) of "none" collapse/expand indicator lines when I specified "Group results by" the boolean field which is not defined as "required".

The tickets are grouped in 2 groups and it is right I think.

But both groups have "none" indicated in collapse/expand indicator line. It is not a good idea, I think.

Boolean field which is not set as "required" contains 3 values, "Yes", "No" and " (blank, or to say, not specified) ", so it is better to be grouped in different labels.

Could it be changed the label of "none" for " (blank, or to say, not specified) " to "null", "No Value", or " (blank) " ?

Kind regards,

- Reported version
Redmine 2.5.0.stable. Details are as follows.
 1. Test redmine (Windows7)

Environment:

Redmine version 2.5.0.stable
Ruby version 1.9.3-p231 (2012-05-25) [i386-mingw32]
Rails version 3.2.17
Environment production
Database adapter Mysql2

2. Production redmine (Linux)

Environment:

Redmine version 2.5.0.stable
Ruby version 1.9.3-p484 (2013-11-22) [x86_64-linux]
Rails version 3.2.17
Environment production
Database adapter PostgreSQL

Associated revisions

Revision 13921 - 2015-01-19 22:23 - Jean-Philippe Lang

Fixed that boolean custom field groups have same label for blank and false values (#18894).

Revision 14020 - 2015-02-18 12:33 - Jean-Philippe Lang

Merged r13921 (#18894).

Screen capture

Here is a screen capture of query-result grouped by boolean field. In the picture, Boolean1optional is a boolean field without "required" specification. You could see 2 groups with "none" group label.

Notes on Label Texts

It is simple to reflect the values to the label texts, ie. Yes/No/null(or "blank").

Notes on translation

I am afraid translation texts may be affected when changing the label texts. For example, "none" is translated to "なし" in Japanese.

I agree, would you fill a separate ticket for this? Thanks.

Per your request, I created a separate ticket, #18918.

Thank you for your quick response. I appreciate redmine team very much.
