Redmine - Feature #19003

Selection of User/Role -based Settings e.g. Email Notification & Issues Visibility

2015-02-03 00:08 - James H

Description

This is related to user-based or role-based settings such as the "Email notifications" in "My account" and the "Issues visibility" in "Roles and permissions".
If there are other settings that I have overlooked, then this should also apply to those cases as appropriate.

Overview

Propose that these settings ("Email notifications" in "My account" and the "Issues visibility" in "Roles and permissions") be changed to a checkbox format, so as to allow more resolution/flexibility.

i.e...

Email Notifications

Current

2015-02-02_14-44-37_Myaccount.png

Proposed

In the form of checkboxes or similar execution:

Events		Projects
For things I watch		For all my projects
For things I am assigned to		For selected projects only
For things I am an owner of		

This also eliminates the need for "For all events" and "for events I'm involved in" because selecting a combination (or all) of the options from the "Events" options is equivalent.

Issues Visibility

Current

2015-02-02_14-46-08_Roles.png

Proposed

In the form of checkboxes or similar execution:

Issues
Private Issues
Issues Created by User

	Issues Assigned to User
	Issues Watched by User

These options are a step in the right direction to provide much more flexibility to the users for those particular settings (and potentially others that I may have missed).

Ideal/Wow

Another option (ideal?) would be to allow multiple permutations of the selections per User or per Role.
e.g.
being able to select multiple email notification settings such as:
"For things that I watch; for selected projects (project1, project2)"
"For things I created; for selected projects (project2, project3)"
"For things I'm assigned to; for selected all projects"
for a single user.
This could be achieved with a "add/remove" new rule type of method.

What are typos?
I cannot find.

#4 - 2015-03-03 18:40 - James H

Cant tell if serious...
but a typo is a typing mistake of any kind, such as bad spelling or just any mistake in general. =)

#5 - 2015-03-03 18:50 - Toshi MARUYAMA

I know typo meaning.
I cannot find typos in your description.
What typos in your description?

#6 - 2015-03-03 20:02 - James H

Ohh.. like:
"This is related to ~~settings~~ user-based or role-based settings"
should be:
"This is related to user-based or role-based settings"

Not sure if there are more in this issue, its been a little while since I posted this, but I do make typo mistakes here and there in my issues.
