

Redmine - Defect #19017

Wiki PDF Export: <pre> not rendered with monospaced font

2015-02-03 23:44 - Marcel Müller

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Toshi MARUYAMA	% Done:	0%
Category:	PDF export	Estimated time:	0.00 hour
Target version:	3.2.0	Affected version:	2.6.1
Resolution:			
Description			
<p>In redmine < pre > tags are rendered with a monospaced font. When exporting a wiki with a < pre > element, this element is not rendered with a monospaced font, losing the intended "formatting".</p> <p>Simple example: PdfExportHtmlVsPdf.png</p>

Merged r14908, r14909 and r14910 from trunk to 3.2-stable (#19017)

Revision 14950 - 2015-12-06 07:35 - Toshi MARUYAMA

pdf: use "family" parameter instead of l(:general_pdf_fontname) at SetFont method (#19017)

Contributed by Jun NAITOH.

Revision 14951 - 2015-12-06 08:22 - Toshi MARUYAMA

revert r14950 (#19017)

r14907 breaks Arabic italic pdf rendering.

Revision 14959 - 2015-12-06 13:21 - Toshi MARUYAMA

pdf: use "family" parameter instead of l(:general_pdf_fontname) at SetFont method (#19017)

Contributed by Jun NAITOH.

Revision 14960 - 2015-12-06 13:21 - Toshi MARUYAMA

pdf: remove italic from DejaVuSansMono (#19017)

DejaVuSansMono Italic Arabic font has problem.

Contributed by Jun NAITOH.

Revision 14961 - 2015-12-06 13:24 - Toshi MARUYAMA

Merged r14959 from trunk to 3.2-stable (#19017)

pdf: use "family" parameter instead of l(:general_pdf_fontname) at SetFont method.

Contributed by Jun NAITOH.

Revision 14962 - 2015-12-06 13:24 - Toshi MARUYAMA

Merged r14960 from trunk to 3.2-stable (#19017)

pdf: remove italic from DejaVuSansMono.

DejaVuSansMono Italic Arabic font has problem.

Contributed by Jun NAITOH.

Revision 14963 - 2015-12-06 13:36 - Toshi MARUYAMA

pdf: use all lower cases for DejaVuSansMono (#19017)

Revision 14964 - 2015-12-06 13:38 - Toshi MARUYAMA

Merged r14963 from trunk to 3.2-stable (#19017)

pdf: use all lower cases for DejaVuSansMono.

History

#1 - 2015-02-05 20:48 - Marcel Müller

I think the problem is in [this line](#). "set_default_monospaced_font" should not be set to the default content-font (a non monospaced font). Removing this line works for me.

#2 - 2015-03-03 15:24 - Toshi MARUYAMA

- File *fonts.png* added

Marcel Müller wrote:

| *Removing this line works for me.*

But, Cyrillic is broken.

fonts.png

#3 - 2015-03-03 15:27 - Toshi MARUYAMA

I have created issue.

<https://github.com/naitoh/rbpdf/issues/11>

#4 - 2015-11-21 06:52 - Jun NAITOH

- File *rbpdf-1.19.0_monospaced_font.pdf* added

- File *pdf_monospaced_font_r14882.patch* added

This is font problem.

rbpdf 1.19.0 was added DejaVu SansMono font,

and **Supported for font subsetting**. (for reduce the size of documents using large unicode font files.)

Please use monospaced font. (see attached patch and sample pdf.)

#5 - 2015-11-23 05:43 - Go MAEDA

- Target version set to 3.2.0

Thanks for the patch. Works fine for me.

#6 - 2015-11-28 07:29 - Toshi MARUYAMA

- Assignee set to Toshi MARUYAMA

#7 - 2015-12-04 08:21 - Toshi MARUYAMA

- File Arabic.txt added

I have committed from r14907 to r14911 without this change.

```
=== (+3,-1) lib/redmine/export/pdf.rb ===
@@ -55,6 +55,8 @@
    style.delete!(('B' if l(:general_pdf_fontname) == 'freeserif'
    # DejaVuSans Italic Arabic and Persian font has problem.
    style.delete!(('I' if l(:general_pdf_fontname) == 'DejaVuSans' && current_language.to_s.casecmp("vi") != 0
+   # DejaVuSansMono Italic Arabic font has problem.
+   style.delete!(('I' if l(:general_pdf_fontname) == 'DejaVuSansMono'
    super(family, style, size, fontfile)
    end
    alias_method :set_font, :SetFont
```

I cannot see difference with and without this change on attachment:Arabic.txt.

Is this change needed?

#8 - 2015-12-04 08:23 - Toshi MARUYAMA

Toshi MARUYAMA wrote:

| *I cannot see difference with and without this change on attachment:Arabic.txt.*

On Arabic locale.

#9 - 2015-12-05 07:26 - Jun NAITOH

| *I cannot see difference with and without this change on attachment:Arabic.txt.*
| *Is this change needed?*

I checked it once again. so, this change is unnecessary, Sorry.

Because Redmine 3.2(r14911) used a monospaced font in the pre tag, but a style(bold/italic) wasn't applied in the pre tag.

#10 - 2015-12-05 11:55 - Toshi MARUYAMA

- File pdf.png added

- File html.png added

But monospace italic is in HTML source.

Does not PDF support "code" and `#{font-style: italic; font-family: monospace}word%`?

```
#{font-style: italic; font-family: monospace}italic monospace%
_italic_
@monospace@
```

```
<pre>
pre
</pre>
```

Toshi MARUYAMA wrote:

| *But monospace italic is in HTML source.*
| *Does not PDF support "code" and %`{font-style: italic; font-family: monospace}word%`?*

PDF don't support "code" and %`{font-family: monospace}word%`

but, PDF support %`{font-style: italic; font-family: DejaVuSansMono}word%`

If use %`{font-style: italic; font-family: DejaVuSansMono}word%`, it's no problem by following setting on Arabic locale.

```
style.delete('!') if !(:general_pdf_fontname) == 'DejaVuSans' && current_language.to_s.casecmp("vi") != 0
```

#12 - 2015-12-06 05:53 - Toshi MARUYAMA

I can see DejaVuSansMono italic has problem in Vietnamese, but I cannot see in Arabic.

Where is source?

#13 - 2015-12-06 07:48 - Toshi MARUYAMA

Toshi MARUYAMA wrote:

| *I can see DejaVuSansMono italic has problem in Vietnamese, but I cannot see in Arabic.*

This behaviour changes frequently. "family" parameter of SetFont() sometimes comes all lower-cases.

source:trunk/lib/redmine/export/pdf.rb@14949#L53

r14950 stabilizes behaviour changes.

#14 - 2015-12-06 08:31 - Toshi MARUYAMA

Toshi MARUYAMA wrote:

| *r14950 stabilizes behaviour changes.*

But r14950 breaks Arabic italic pdf rendering again.

#17 - 2015-12-06 13:27 - Toshi MARUYAMA

r14950 is wrong.

```
style.delete!(l) if family.to_s.casecmp('DejaVuSans') != 0
```

should be

```
style.delete!(l) if family.to_s.casecmp('DejaVuSans') == 0
```

#18 - 2015-12-06 13:29 - Toshi MARUYAMA

Jean-Philippe Lang wrote:

| *I'm closing this for 3.2 release. If there any problems pending, please open another issue.*

3.2-stable r14962 has completed.

Please release version:3.2.0.

#19 - 2015-12-06 13:39 - Toshi MARUYAMA

Toshi MARUYAMA wrote:

| *3.2-stable r14962 has completed.*

Sorry, I have committed very minor 3.2-stable r14964.

Please release version:3.2.0.

#20 - 2015-12-06 15:02 - Jean-Philippe Lang

Thanks.
