Description

Hi,
In my redmine application i added some plugins while overriding a same patch in different plugin but it take priority with the top level i unable to run my bottom plugin patch.

For Example:

```
Plugin 'A'    Am writing patch for issues controller and issue before_save callBack
plugin 'B'    Am overriding same issue controller patch and model before_save callBack
```

The above scenario Plugin 'A' patch's only running plugin 'B' code doesn't run

Any one have any solution for this?

History

#1 - 2015-02-04 07:29 - Thiyagarajan Thulasi

For the above 2 plugin's are mandatory in my application what to do, both the plugin's callbacks are having different functionalists.
