

Redmine - Defect #1904

MIME headers are not fully correct

2008-09-15 06:21 - Alon Bar-Lev

Status:	Closed	Start date:	2008-09-15
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Email notifications	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Wont fix		
Description Hello, I noticed that gmail does not recognize redmine emails as directed to me. This is due to the following headers: From: noreply@redmine.org Bcc: edavis@xx.com , alon.barlev@xxx.com , joe@xxx.com , arthaey+redmine@xx.com , bradley@xxx.com 1. Please notice that I can see the Bcc, which I should not usually be allowed to see. 2. There is no To: header. I think that every time you send an email message you should add only To: header which should contain the destination address, and drop the Bcc header. Thanks!

- File *sproutventure.com.txt* added

I can verify this issue.

Attached is an image of what is shown in gmail (I use Google Apps) and the raw email.

Hi Dan,

this is a public internet page therefore it is discouraged to publish other people email addresses. Harvesting is a fast and automated operation, so please remove at least the text file. Thank you.

#3 - 2009-01-18 13:14 - Jean-Philippe Lang

- Status changed from New to Closed
- Resolution set to Wont fix

If you want Redmine to use the "To" field, uncheck "Blind carbon copy recipients (bcc)" in application settings.

Hi Jean-Philippe, one point mentioned in the description hasn't been addressed. When I receive an e-mail from Redmine, I can see the 'bcc' field with everyone's e-mail addresses in. This field should not be visible in mail clients. When I send e-mails from my mail client (Mail.app on OS X), the

recipients can't see the bcc field.

The point of using BCC fields is so that e-mail addresses aren't disclosed, but Redmine is disclosing them even when set to use 'bcc'.

Please can this be re-opened as a security issue? Because it means my e-mail address has been disclosed to many users as Redmine has sent out e-mails about tickets I'm interested in.

Thank you

Russell Hind
