## Description

'label\_per\_page' in config/locales/\*.yml is not used in current trunk. Probably we can delete it.

The string was introduced in <u>r37</u> and formaly used in app/views/projects/list\_issues.rhtml. But the file was deleted in <a href="mailto:re87">re87</a> and the string 'label\_per\_page' has not been used after that.
