| **Target version:** | | | | |
| **Resolution:** | Invalid | | **Affected version:** | |
| **Description** | | | | |
| Redmine version: 0.7.3.1711. | | | | |

## History

**#1 - 2008-09-15 22:02 - Jean-Philippe Lang**

Is this role able to change issue subject and description or just to change its status ?

**#2 - 2008-09-16 10:05 - Finn Gruwier Larsen**

It can change status, assigned-to, % finished and target version - not subject and description.

**#3 - 2008-09-17 19:23 - Jean-Philippe Lang**

*- Status changed from New to Closed*

*- Affected version (unused) deleted (0.7.3)*

*- Resolution set to Invalid*

*- Affected version deleted (0.7.3)*

These 4 fields can be edited if the user is allowed to change the issue status. So, you have to adjust your workflow if you don't want this user to be able to change the issue status (and the 3 other attributes).
Go to Administration -> Workflow and disable status transitions for this role on every tracker.

**#4 - 2008-09-18 09:27 - Finn Gruwier Larsen**

Actually I do want the user to be able to change status (according to the workflow rules), but not the three other values. So I still have a problem (apart from that the current solution is not intuitively understandable).
