

Redmine - Defect #19095

PDF is broken on iOS

2015-02-12 17:48 - Marcel Müller

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	PDF export	Estimated time:	0.00 hour
Target version:	2.6.6	Affected version:	2.6.1
Resolution:	Fixed		

Description

When viewing a pdf which was exported in redmine on an iOS device (iPhone / iPad) it's dimensions are messed up and scrolling (in safari) is not possible.

Windows:

iOS:

Can't upload the pdf (as it's too large), but here's a link: <https://dl.dropboxusercontent.com/u/46574377/Test.pdf>

**Related issues:**

**History**

**#1 - 2015-02-16 12:01 - Jun NAITOH**

I have created issue.  
<https://github.com/naitoh/rbpdf/issues/10>

**#2 - 2015-02-16 14:51 - Marcel Müller**

Replaced the installed rbpdf.rb with the new one and layout looks good on iOS now - although zooming in (with pinch-to-zoom) is still not possible when viewing the pdf in safari.

What does 'with pinch-to-zoom' mean?  
I think looks good pdf in safari on iOS 8.1.3 by replaced rbpdf.rb.

I don't know it is related or not, it seems this pdf is made by [#19017](#) modification.

**#5 - 2015-04-01 23:18 - Marcel Müller**

Sorry, missed your replies!  
I reverted the modification made in [#19017](#) and rechecked the issue, it's still there. After further investigation I noticed that this is related to a theme I'm using which doesn't allow zooming the viewport (something like user-scalable=no in a viewport-meta) and safari on iOS preserves this configuration for displaying the pdf after clicking the "PDF-Link". If I open the URL directly, everything is working fine (as well as when using the standard theme). Sorry for the confusion here.

What I'm still wondering: Is it correct, that a wiki page with such few information (see first post) generates a PDF file with > 800KB?

Thanks for your help!

**#6 - 2015-05-01 07:26 - Toshi MARUYAMA**

- Status changed from New to Needs feedback

Can we close this issue?

Because of embedded fonts.

**#7 - 2015-05-03 03:46 - Marcel Müller**

The issue itself is fixed with the rbpdf 1.18.6, but this version wasn't released yet. Therefore I'm not sure if this issue should be open until 1.18.6 is released or can be closed.

**#8 - 2015-05-03 08:34 - Toshi MARUYAMA**

- Status changed from Needs feedback to New

**#9 - 2015-06-20 13:49 - Jun NAITOH**

This problem fixed by rbpdf 1.18.6.  
please bundle update.

**#10 - 2015-06-21 10:24 - Toshi MARUYAMA**

- Target version set to 2.6.6

**#11 - 2015-06-24 02:28 - Go MAEDA**

- Related to Feature #20142: Update Gemfile to require rbpdf ~>1.18.6 added

**#12 - 2015-06-28 10:01 - Jean-Philippe Lang**

- Status changed from New to Closed

- Resolution set to Fixed
