Description

Now we can see a pager at the footer. So we have to scroll to bottom to just to another page. So I propose to add the same line with pages to the page header (right after the parent pages references).

For example:

Forums » Help »

1 2 3 ... 8 Next » (1-25/185)

How do I get Page_index on my wiki start page?

... page contents goes here ...

1 2 3 ... 8 Next » (1-25/185)
