Description

Hi,

I just just updated (**gulp**) from 2.3.1 to 2.6.1.stable.14014 and find I can no longer archive projects.
What could be causing this?

My log:

```

Sorry, I mistook changing status.

Thanks for the quick reply. I solved the issue just now.

The solution was to completely re-install Redmine. It turned out I had quite a lot of artifacts remaining from my old 2.3 installation. I backed up my own configuration + files, removed Redmine, reinstalled the 2.6 branch and moved my own files back. Everything is working fine now.

Hope this helps someone!
