

Redmine - Defect #19185

Update Install/Upgrade guide for 3.x version and get rid of DEPRECATION WARNING: You didn't set config.secret_key_base

2015-02-25 13:56 - Pavel Potcheptsov

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Jean-Philippe Lang	% Done:	0%
Category:	Documentation	Estimated time:	0.00 hour
Target version:	3.0.2	Affected version:	3.0.0
Resolution:			
Description			
Need to add section for 3.x install and upgrade to 3.x where change such text			
Run the following command from your new Redmine root directory:			
<pre>bundle exec rake generate_secret_token</pre>			
This will generate a file (config/initializers/secret_token.rb) with a random secret used to secure session data.			
to something like:			
- follow official guide			
- or just create secrets.yml file with such content:			
<pre>production: secret_key_base:</pre>			
- run rake secret and copy/paste output after secret_key_base :			
Otherwise you'll get DEPRECATION WARNING: You didn't set config.secret_key_base in your production.log

Not only wiki but also [source:tags/3.0.1/doc](#) .

#3 - 2015-03-30 15:50 - Olivier Houdas

Note: secrets.yml should be in /config (whereas secret_token.rb was in /config/initializers)

#4 - 2015-04-25 10:15 - Jean-Philippe Lang

- Status changed from New to Closed
- Assignee set to Jean-Philippe Lang

rake generate_secret_token was changed to generate the config.secret_key_base, it's fine for new installs. The problem occurs when upgrading from 2.x. Additional information is added the docs in [r14217](#).
Thanks for pointing this out.
