

Redmine - Defect #19197

Missing notification if assignee was a group

2015-02-26 14:43 - Federico Di Dio

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Jean-Philippe Lang	% Done:	0%
Category:	Email notifications	Estimated time:	0.00 hour
Target version:	2.6.3	Affected version:	
Resolution:	Fixed		
Description			
If the old assignee of an issue is a group, no mail is sent to notify change of assignee. The feature was clearly intended to be there, as there are explicit checks for this case.			
Attached a patch for trunk.

- Category changed from Issues to Email notifications

#4 - 2015-03-07 09:21 - Jean-Philippe Lang

- Tracker changed from Patch to Defect

- Status changed from New to Resolved

- Assignee set to Jean-Philippe Lang

- Target version set to 2.6.3

- Resolution set to Fixed

Fix committed in [r14049](#), thanks for pointing this out.

#5 - 2015-03-08 10:41 - Jean-Philippe Lang

- Status changed from Resolved to Closed

Merged.

#6 - 2015-03-17 19:53 - Deoren Moor

Is this feature separate from the Email Notifications setting?

Settings > Email notifications > Select actions for which email notifications should be sent > Issue updated > Assignee updated

With v2.6.3 we're noticing notifications for Assignee changes when the previous Assignee was a group, but not when the previous Assignee was a specific user.

Is the group assignment change notification also subject to the Email notifications setting or is it a separate feature?

#7 - 2015-03-17 20:47 - Jean-Philippe Lang

Is this feature separate from the Email Notifications setting?

If this setting (Issue updated > Assignee updated) is checked, a notification should sent whenever the assignee changed (no matter if it was a user, a group or nobody).

This defect that was fixed in 2.6.3 is about **who** was notified: if the previous assignee was a group, the group members were not notified.

This defect that was fixed in 2.6.3 is about **who** was notified: if the previous assignee was a group, the group members were not notified.

Thanks for clarifying that. I think we're seeing unintentional behavior with the new change.

We have a project called "Unassigned" where all incoming issues are stored. They're assigned to a a group for processing. A member of that group thens take those unassigned tickets and assigned to the appropriate technician.

When we ran 2.6.1 with these Email notification settings:

```
[x] Issue added
[ ] Issue updated
    [x] Note added
    [ ] Status updated
    [ ] Assignee updated
    [ ] Priority updated
[x] News added
[x] Comment added to a news
[x] Document added
[x] File added
[x] Message added
[x] Wiki page added
[x] Wiki page updated
```

everyone in the group was notified of the new issue, but nothing past that, regardless of whether a Note was added to the issue when it was moved.

Now after the upgrade to 2.6.3 with the same Email notification settings the group is notified when the issue is reassigned. Presumably this only occurs if a comment is added, but we have not tested that part.

Is this the intended behavior? I'll be happy to open a new issue and test various scenarios if it's not.

#9 - 2015-03-18 07:50 - Jean-Philippe Lang

Yes, it's the expected behaviour after the fix, is it a problem for you ?

Thank you for your reply. To be clear, should we see an email notification when the Assignee changes even if we have the Email notification settings

as indicated in [#19197#note-8](#)? I had to go back and modify that post to include the missing option so the list would properly match our settings (both before and after the upgrade to 2.6.3).

is it a problem for you ?

I personally like the feature, but my team members are less enthusiastic about it.

It seems if I read your last post properly then that feature is tied to the **Assignee updated** option on the **Email notifications** tab. If it's checked, then those notices are sent, otherwise if it is *not* checked, no notifications would be sent. If that's true then we wouldn't be receiving these notifications at all.

#11 - 2015-03-21 20:45 - Deoren Moor

I opened [#19443](#) and used some of my previous comments to explain the issue. Please let me know if I can assist with testing any patches/changes to help resolve this.

#12 - 2015-08-15 12:27 - Michal Kowalski

I get no notifications that issue was created when assignee is a group in Redmine version 2.6.3.stable.14166

Do not post on closed issue.

Check your mail addresses of list are all valid ([#8157](#)).
