

Redmine - Defect #19259

POPAuthenticationError: Command is not valid in this state

2015-03-03 18:01 - John Nguyen

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Email receiving	Estimated time:	0.00 hour
Target version:		Affected version:	2.6.2
Resolution:	Invalid		
Description			
When attempting to retrieve email via POP3, I came across an error Net::POPAuthenticationError: -ERR Command is not valid in this state.			
The command I used was: rake redmine:email:receive_pop3 RAILS_ENV="production" host=exch.abc.local username= redmine@abc.local password=password123			
I have tried many different variations but after looking at the Ruby on Rails documentation, the host was replaced with address then my error no longer appear: rake redmine:email:receive_pop3 RAILS_ENV="production" address=exch.abc.local username= redmine@abc.local password=password123			

History

#1 - 2015-03-03 18:15 - John Nguyen
