

Redmine - Defect #19283

send\_notification visible in journal\_details after redmine update

2015-03-05 15:18 - Peter Mathis

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:		Affected version:	2.6.2
Resolution:	No feedback		
<b>Description</b> after update my redmine from 2.3.x to 2.6.x the field "send_notification" is saved to journal_details and visible in my history. strangely this field contains the markup from my notification email ... how can this happen?			
<b>Related issues:</b> Related to Redmine - Defect #15612: Long message on update in journal_details... <div>Closed</div>			

History

- #1 - 2015-04-03 09:02 - Toshi MARUYAMA  
- Related to Defect #15612: Long message on update in journal\_details where prop\_key = 'send\_notification' added
- #2 - 2015-04-03 09:04 - Toshi MARUYAMA  
- Status changed from New to Needs feedback
- See [Submissions](#).  
Redmine core does not have "send\_notification" key.
- #3 - 2019-04-07 15:35 - Go MAEDA  
- Status changed from Needs feedback to Closed  
- Resolution set to No feedback

Probably the problem is caused by some plugin.
