Description

Observed Behavior

- *UserA* has two roles, *RoleA* and *RoleB*.
- *CustomFieldA* is hidden from *RoleB*. (In Custom Field Edit form, *RoleB* is unchecked for **Visible**.)
- However, *CustomFieldA* is visible to *RoleA*.
- In the **Workflow**, *CustomFieldA* is set as Read-Only for *RoleA*.
- *UserA* can edit *TrackerA*.
- In the Issue Edit form, *CustomFieldA* is displayed. However, any input is ignored (as the Read-Only rule prevents it from being processed.)

Desired/Expected Behavior

- In the Issue Edit form, *CustomFieldA* should not be displayed.

Workaround

- Allow *RoleB* to view *CustomFieldA*.
- In the **Workflow**, set *CustomFieldA* as Read-Only for *RoleB*.
- The UI code correctly does not display Read-Only fields.
