Redmine - Defect #193

Incorrect filtering for unset values

2008-01-17 15:08 - Yuri Astrakhan

Description

Very counter-intuitive: When filtering by   "Category IS NOT ...", all items without assigned category are
not shown in the list. I suspect that the SQL where condition should be changed to "category != x OR category IS
NULL". I haven't checked other, non-category, filters.

Thanks!!!
