**Description**

Hello,

When I run rake test:units
I always get this test failure. Can you please correct this.

1) Failure:
issueNestedSetConcurrencyTest#test_concurrency [E:/REDMINE/DEV3.0/redmine/test/unit/issue_nested_set_concurrency_test.rb:45]:
Expected "Mysql2::Error: Deadlock found when trying to get lock; try restarting transaction: SELECT `issues`.`id` FROM `issues` WHERE (root_id IN (SELECT root_id FROM issues WHERE id IN (390,388))) ORDER BY `issues`.`id` ASC FOR UPDATE" to be nil.

Redmine : 3.0.0
MySql   : 5.6.14

Thanks.

This test fails on MariaDB 5.5, too.

On my CentOS7:

$ rpm -q mariadb
mariadb-5.5.41-2.el7_0.x86_64

Since MySQL 5.6 was set as EOL in February 2021, it would make sense to stop supporting it, right?

#12 - 2021-10-04 15:51 - C S
Is this Since MySQL 5.6 was set as EOL in February 2021, it would make sense to stop supporting it, right?

There are any news?

Only those from #39437.
This issue is fixed in the upcoming Redmine 5.1.1 (it will be released soon) and 6.0.0, but it may require some changes to the database settings, please see all the comments from #39497 and the MySQL configuration page.

I'm closing this as duplicate.
