

Redmine - Defect #19366

Committers: undefined method `compact!' for User::ActiveRecord\_Relation

2015-03-13 00:54 - Nicolas Rodriguez

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	SCM	Estimated time:	0.00 hour
Target version:		Affected version:	3.0.0
Resolution:	Duplicate		

Description

Hi there!

I have installed the plugin on my new Redmine 3.0, configured it, but when I try to manage the comitters of the repository I just added to my project I get this error:

...

Started GET "/repositories/3/committers" for xxx at 2015-03-08 20:40:37 +0100  
Processing by RepositoriesController#committers as HTML  
Parameters: {"id"=>"3"}  
Current user: leobaillard (id=3)  
Completed 500 Internal Server Error in 24ms

NoMethodError (undefined method `compact!' for #<User::ActiveRecord\_Relation:0xb27a3e1c>):  
app/controllers/repositories\_controller.rb:98:in `committers'  
...

Here the patch :

Before :

```
def committers
  @committers = @repository.committers
  @users = @project.users
  additional_user_ids = @committers.collect(&:last).collect(&:to_i) - @users.collect(&:id)
```

After :

```
def committers
  @committers = @repository.committers
  @users = @project.users.collect(&:id)
  additional_user_ids = @committers.collect(&:last).collect(&:to_i) - @users
```

Thank you!

History

#1 - 2015-03-13 05:26 - Toshi MARUYAMA

- Status changed from New to Needs feedback

Try [#19253](#).

#2 - 2015-03-14 10:55 - Jean-Philippe Lang

- Status changed from Needs feedback to Closed

- Resolution set to Duplicate

This is already fixed for 3.0.1.

#3 - 2015-03-14 11:23 - Nicolas Rodriguez

Thank you!
