<b>Resolution:</b>	Fixed		
<b>Description</b>			
#19260#note-4			
<i>This patch (r14050) introduces the possibility of having 2 (or more) repositories with empty identifier. Is this something intendend?</i>			
<i>Maybe a self.save(validate: false) in clear_extra_info_of_changesets would have done the job too? (specially if the repository is about to be deleted)</i>			

#### Associated revisions

##### Revision 14142 - 2015-03-20 11:20 - Jean-Philippe Lang

Don't allow 2 repositories with blank identifier (#19400).

##### Revision 14143 - 2015-03-20 11:23 - Jean-Philippe Lang

Don't validate the repository when updating/clearing extra info (#19400).

##### Revision 14147 - 2015-03-21 09:26 - Jean-Philippe Lang

Merged r14142 and r14143 (#19400).

##### Revision 14148 - 2015-03-21 09:29 - Jean-Philippe Lang

Merged r14142 and r14143 (#19400).

##### Revision 14156 - 2015-04-11 08:27 - Jean-Philippe Lang

Fixed that 2 repositories can be created with blank/nil identifier (#19400).

##### Revision 14161 - 2015-04-12 08:53 - Jean-Philippe Lang

Fixed tests failures (#19400).

Revision 14197 - 2015-04-25 09:18 - Jean-Philippe Lang

Merged r14156 and r14161 (#19400).

Revision 14198 - 2015-04-25 09:18 - Jean-Philippe Lang

Merged r14156 and r14161 (#19400).

## History

---

**#1 - 2015-03-17 00:50 - Toshi MARUYAMA**

- Target version changed from 2.6.3 to 2.6.4

**#2 - 2015-03-17 01:16 - Nicolas Rodriguez**

- File Configuration - test - Redmine.png added

Maybe I should precise the context : I'm the maintainer of [Redmine Git Hosting](#) plugin and this patch brings the side effect describe above.

I dug this [issue](#) and the decision about repository identifier presence is not very clear.

This [comment](#) of jpl let me think that only one repository per project can have empty identifier.

Can you confirm (or not) that it's the case?

I've put a screenshot of the issue in attachment.

**#3 - 2015-03-21 09:24 - Jean-Philippe Lang**

- Status changed from New to Resolved

- Assignee set to Jean-Philippe Lang

- Resolution set to Fixed

**#4 - 2015-03-21 09:30 - Jean-Philippe Lang**

- Subject changed from possibility of having 2 (or more) repositories with empty identifier to Possibility of having 2 (or more) repositories with empty identifier

- Status changed from Resolved to Closed

- Affected version set to 2.6.3

**#5 - 2015-04-04 03:02 - Nicolas Rodriguez**

Hi!

Thanks for your patch! But I think there still an issue... I test Redmine Git Hosting plugin with Travis (as you do) and one the test is still failing :

[https://travis-ci.org/jbox-web/redmine\\_git\\_hosting](https://travis-ci.org/jbox-web/redmine_git_hosting).

As you can see I test Redmine Git Hosting with Redmine 2.6.2/3.0.0 (from tarball) and 2.6-stable/3.0-stable (from SVN) and both stable branch are broken. (from plugin point of view).

It's about identifier uniqueness.

Here the test :

before do

2019-06-20

2/3

```
@repository_1 = create_git_repository(project: @project_child, is_default: true) # Create a repo in database with no identifier
end

describe "Test uniqueness" do
  context "when blank identifier is already taken by a repository" do
    it { expect(build_git_repository(project: @project_child, identifier: "")).to be_invalid } # This one fails
  end

  context "when set as default and blank identifier is already taken by a repository" do
    it { expect(build_git_repository(project: @project_child, identifier: "", is_default: true)).to be_invalid } # This one pass
  end
end

....
```

It seems that depending on the "default status" of a repository you can still create 2 repositories with blank identifier.

**#6 - 2015-04-04 04:17 - Toshi MARUYAMA**

- Status changed from Closed to Reopened

**#7 - 2015-04-25 09:18 - Jean-Philippe Lang**

- Status changed from Reopened to Closed
