Redmine - Defect #19406

Cannot set multiple "tasks with precedes/follows relationship" to *all* become child-tasks of some parent

2015-03-17 11:57 - Friedrich Schiller

Resolution:	Duplicate		**Affected version:**	

Description

Hi,
 	
I have 3 tasks where one follows the other:
 	
`task1 -> task2 -> task3`
 	
Then I create a new task: parent_task.
 	
Now I **cannot** set parent_task to be the parent of *all of* task1 **and** task2 **and** task3.
 	
The error message (when using bulk editing mode-> selecting all 3 issue with Ctrl and then right-click edit) is
 	
`Failed to save 2 issue(s) on 3 selected: #67, #68.`
 	
`    Parent task is invalid: #67, #68`
