Description <p>Reqtify is a traceablility tool developed and on-sale by Dassault Systèmes, which interacts with various management & authoring tools and analyses many types of computer document files.</p> <p>It is already coupled with Bugzilla, JIRA, SVN, TestLink, etc., and how to couple them are described in its manual. Transferring elements in Reqtify to coupled tool as sections in a document, requirements or tasks in a tool, and changes or progreses are refrected vice-versa.</p> <p>If someone near them could contact to Dassault Systèmes to let them develop the coupling option, we were ready to buy licenses for our enterprise use. Also, Dassault Systèmes may need REST API explanation support by your community.</p>
