Category:	SCM		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Duplicate			

Description

I think it'll be nice to be able to commit spent time via SCM. Based on def scan_comment_for_issue_ids or by extending it.

Something like this:

Fixes #12*. Spent 6 hours.* <- adds 6 hours for spent time on issue number 12 and closes it.

Closes issue #52*,* #54*. Spent 8 hours.* <- adds 4 hours for spent time to issue 52 and 54. And closes both.

Commited a lot of stuff. Spent 10 hours. <- Does nothing, couse no issue number was provided

Possible problems:
Dunno what it'll do on repository refresh/remove+add?
Maybe we can add one more bool flag to time_entries table. For example: added_via_scm (true, false) to avoid wild multiplying hours.

What do you think? Is it possible?

History

#1 - 2008-09-24 19:28 - Jean-Philippe Lang

- Status changed from New to Closed

- Resolution set to Duplicate

Discussed and patch in #1518.
